About Me

Flutter Developer with 2.9 years of professional experience designing, developing, and deploying high-performance mobile applications for iOS and Android. Skilled in building user-friendly interfaces, integrating third-party services, and implementing secure payment gateways. Experienced in collaborating with cross-functional teams and delivering apps with 1M+ downloads. Passionate about writing clean, maintainable code and exploring new technologies to enhance app performance and user experience.

Skills

Languages: Dart, Java, Swift, C++

Technologies: Flutter, Firebase, Firestore, RESTful API, Supabase

State Management: GetX, Provider, Riverpod

Development Tools: Android Studio, Xcode, Visual Studio Code (VSCode), Postman

API & Service Integrations: CleverTap, Google Maps, Google Mobile Ads (AdMob)

Payment Gateway Integrations: Razorpay, PhonePe, Checkout, Apple Pay, Tamara, Tabby

Cloud: AWS S3, Cloudflare

Version Control: Git, GitHub, BitBucket

Experience

Akbar Travels: Flights & Hotels Pune, Maharashtra *Flutter Developer January 2025 - Present*

- Developed and maintained AkbarTravels: Flights & Hotels, an app using Flutter, ensuring seamless functionality on both iOS and Android platforms.
- Built and optimized core features that make Akbar Travels a leading platform for affordable flights, hotel bookings, visa services, and holiday packages.
- Utilized state management techniques GetX for efficient application state management.
- Actively contributed to the development lifecycle by translating requirements into functional features, ensuring smooth integration with existing app architecture.
- Worked with CRM for task assignment, planning, and completion tracking.
- Played a key role in app deployment and updates on the Google Play Store and Apple App Store.
- Demonstrated strong teamwork and communication skills, effectively coordinating with designers, developers, and stakeholders to ensure smooth project execution.

Movilidad Technologies: Travel Pune, Maharashtra *Flutter Developer June 2023 - December 2024*

- Integrated Google Maps with real-time location tracking, improving navigation functionality and user engagement by 25% while enhancing app usability.
- Implemented WebSocket for real-time communication, reducing data sync delays by 30%, enabling instant updates and improving the overall responsiveness of the app.
- Developed background services for continuous location tracking and data processing, increasing app reliability and uptime by 20% without draining device resources.
- Added custom animations and transitions to the UI, improving user interaction and visual appeal, leading to a 15% boost in user retention and satisfaction.
- Created a fully responsive UI, ensuring optimal performance across devices and screen sizes, increasing cross-platform compatibility and reducing design rework by 20%.

Projects

Benzy Infotech (Akbar Travels Group): Akbar Travels: Flights & Hotels

Android: [Play Store](#) | *iOS:* [App Store](#)

- Developed and maintained Akbar Travels: Flights & Hotels at Benzy Infotech (Akbar Group) using Flutter, ensuring high performance on iOS and Android with 1M+ downloads.
- Built core features for flights, hotels, visa services, and holiday packages, delivering a seamless user experience.
- Integrated CleverTap for push notifications, Deep Linking for smooth navigation, and payment gateways (Razorpay, CashFree, Tamara, Tabby) for secure transactions.
- Leveraged Hive for fast local storage and worked with CRM for task management and planning.
- Integrated a fully interactive ChatBot using WebSocket, enabling seamless real-time chat with an AI bot for query resolution, faster assistance with ticket booking, cancellations, and download issues, instant communication with live support agents when escalations occur, and zero-delay messaging thanks to real-time WebSocket connectivity.
- Successfully launched on both platforms. Available on App Store and Play Store.

Movilidad Technologies Buggy Sarathi

Android: [Play Store](#)

- Developed and deployed a driver app from scratch, incorporating industry-standard features like background services for real-time location tracking and Google Maps integration, improving route accuracy and driver efficiency by 30%.
- Implemented WebSocket technology for instant ride notifications, reducing response times by 40% and ensuring seamless real-time communication between drivers and the platform.
- Integrated payment gateway and S3 bucket for document uploads, streamlining driver onboarding and payment processes, improving operational efficiency by 15%.
- Added Firebase push notifications, a floating app bubble, and custom audio alerts for ride requests, enhancing driver engagement and improving response rates by 25%.

Buggy

Android: [Play Store](#)

- Spearheaded the development of Buggy, a customer-centric ride-hailing app for Android and iOS, implementing industry standard features that increased user engagement by 30% and positioned the app alongside leaders like Ola and Uber.
- Designed and integrated an intuitive user interface, optimizing user experience for effortless navigation, which contributed to a 25% increase in customer satisfaction ratings.
- Developed robust backend services to handle ride requests, driver allocations, and real-time tracking, enhancing service delivery speed by 20% and ensuring reliable transportation for users.
- Incorporated WebSocket technology, Google Maps, and Places API for efficient location tracking and route navigation, alongside Firebase notifications and a moving marker feature (like Rapido), increasing operational reliability and user trust by 15%.

Education

Dr Babasaheb Ambedkar Technological University

B.Tech in Computer Science and Engineering

CGPA: 8.47

Pune, India

February 2019 - June 2023
